

# ONE TO ONE

# CAMPAIGN

*Professional Outreach Packets*

## About the Campaign

The One to One Campaign is led by the Professional Outreach Committee to coordinate efforts of OA groups interested in carrying the message of recovery to the medical community and associated health fields about OA's program. These would be medical professionals such as physicians, therapists, psychologists, counselors, hospitals and treatment centers.

## Presentation packets

These come from the WSO so that individual members can take to their scheduled appointments with a medical professional such as those listed above. As a member you may want to share a short description about your own OA experience with your medical care specialist.

Ask the professional to look at the literature and to consider referring any patients or clients to OA meetings. As a member, you can also offer to take the professional to an open OA meeting. This may help the professionals feel more at ease about recommending OA to their patients or clients.

Each group will be given one to two packets. Please only take one if you plan to contact a medical professional. These folders will include a cover letter to the professional, the Courier newsletter and other pamphlets for review. Also enclosed will be our meeting list.
